## SUMMARY

Product-focused CMU M.S. student with 2+ years of experience turning user insights into shipped AI and e-commerce products. Led UX research and feature prioritization for an LLM product (+15% adoption) and built 0→1 tools, including one adopted across 4–5 teams.

## EDUCATION

**Carnegie Mellon University, Mountain View, California**  
M.S. in Software Management  
*Coursework: Product Management, Architecture & Programming Principles, Software Management*

**National Taiwan University, Taiwan**  
B.S.S. in Bio-Industry Communication and Development, Marketing Focus  
*Coursework: Big Data Analytics, Statistical Modeling with Python & Excel, Data Visualization (All A+)*

## PROFESSIONAL EXPERIENCE

**Category Management Analyst, Shopee, Taipei**  
*Home & Living category | 5 subcategories | 50+ key sellers*  
Jul 2025 - Apr 2026

- Initiated and built an Apps Script tool that cut weekly campaign planning from 4–5 hours to 30 minutes (~9x faster); iterated on feedback and scaled adoption to 4–5 category teams.
- Diagnosed a 10% multi-month sales decline through buyer segmentation and root-cause analysis, then developed a cross-sell strategy that increased repurchase rate by 5%.
- Identified high-growth subcategories and top-selling SKUs through monthly performance analysis, guiding seller subsidies and exposure allocation that contributed to 75% YoY GMV growth.

**Cloud Product Management Intern, Cathay Financial Holdings, Taipei**  
*“Smart Archie” | LLM-powered assistant that turns user requirements into cloud architecture diagrams, reducing solution design time from days to minutes | U.S. patent pending*  
Jul 2024 - Jun 2025

- Led UX research with 7 cloud architects across 2 product versions, translating 15 pain points into prioritized v0.4.1 recommendations and presenting findings to 20+ architects, PMs, and directors
- Turned user feedback into 4 shipped product and UX improvements from v0.4.0 to v0.4.1, partnering with PMs and engineers to increase adoption by 15% among 30+ internal users
- Improved AI-generated architecture compliance from 35% to 60% by converting internal security rules into a retrieval-based library of approved designs.

**Data Analysis Assistant, NTU OpenCourseWare (OCW), Taipei**  
Feb 2025 - Jun 2025

- Analyzed 200+ videos on a channel with 36M+ views, identified first-minute drop-off, and redefined success metrics from clicks to completion rate and watch time; adopted as the team’s new standard.

**Competitive Analysis Intern, Shopee, Taipei**  
Aug 2023 - Jun 2024

- Benchmarked competitor promotion patterns across 1,000+ livestream sessions, translating findings into recommendations for Shopee’s livestream strategy.

## PROJECTS & LEADERSHIP

**Job Intelligence Agent — TypeScript, LLM API | [Case study](#)**

- Designed and built an LLM job-search agent aggregating postings from 6 sources and ranking roles by fit and location, reducing daily search time by 30+ minutes.

**GIST Taiwan — Finance Secretary**  
Jun 2023 - Jul 2024

- Managed a NT\$300K+ event budget and reimbursement/procurement workflows for an 80+ member organization hosting a 200+ participant international forum.

## SKILLS

- Product:** Product Strategy, User Research, Prioritization, Roadmapping, Requirements Definition, Metrics Definition, Product Analytics, Competitive Analysis, Prototyping, Figma
- Technical & Analytical Skills:** Python, SQL, Tableau, AWS, LLM APIs, RAG, Prompt Engineering
